

Getting started: Quick guide

Function indication is given with different colours.

 The function symbol is lit depending on the active function.

No light
The fan is off or activated for continuous operation.

Blue light
The fan runs due to increased humidity.

Flashing blue light
The fan runs because it has detected that it can lower the humidity in the room.

Green light
The air quality sensor has activated the fan.

Purple light
The fan has been started by the airing function.

Yellow light
The fan runs on the timer

Flashing yellow
The delay timer counts down, faster flashes towards the end.

Fine-tuning via the App

The *Fresh ventilation* app can be downloaded to Android and IOS phones. The app gives you access to a variety of settings and functions.

See the Fresh website for detailed information on all fan functions with and without the app, www.fresh.eu

Quickguide for Intellivent ICE

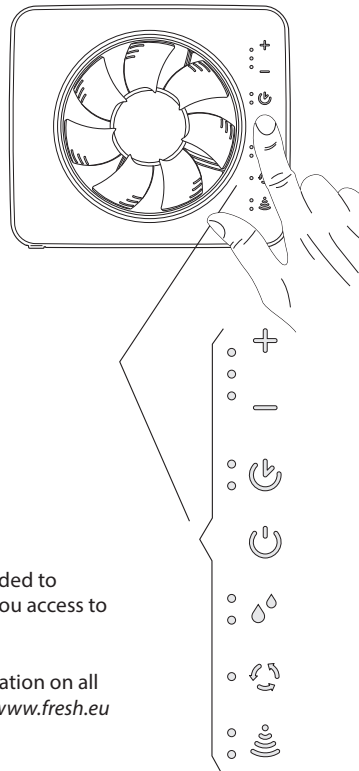

To access the functions that can be programmed. First, press the function icon.

All programmable function symbols light up.

To activate the desired function, press any of the four symbols and then follow the instructions to the right. The process is then ended by pressing the function icon  twice.
